

AIR-HANDLING UNITS  
FOOD APPLICATIONS:  
ham processing

Compact units entirely in stainless steel AISI 304,  
not subject to corrosion and rust, ideal for food  
processes as it is an austenitic material

Vertical execution to limit the installation surface and increase the space dedicated to food conservation; however, the removable panels to access the heat exchangers have been duly provided for

Sizing carried out with dedicated software, special attention is given also to the fan sections, equipped with accessible panel with view port

Specific care is dedicated to the drainage and discharge of the condensate, as well as to the thermal bridge effect which is resolved in design phase thanks to the adoption of the special frame-panels joint of the AZ-S/AZ-H series

*TCF, the air the way you want it.*
